Executed test log

Alain Sauverain ISHEMA | ug2527343@ines.ac.rw | AI-A2-7343

Actual subprocess captures from tools/verify.py. Expected nonzero validation exits count as successful rejection checks. No skipped or failed runs are hidden from this log.

python run_all.py --student-id ug2527343@ines.ac.rw --seed 7343

============================== warnings summary ===============================
.venv\lib\site-packages\fastapi\testclient.py:1
D:\AI\AI_A2_2527343\.venv\lib\site-packages\fastapi\testclient.py:1: StarletteDeprecationWarning: Using `httpx` with `starlette.testclient` is deprecated; install `httpx2` instead.
from starlette.testclient import TestClient as TestClient # noqa

-- Docs: https://docs.pytest.org/en/stable/how-to/capture-warnings.html
28 passed, 1 warning in 17.36s

[no stderr]

Reproducibility: exact byte equality for the fingerprint, metric JSONs, clustering report and prediction CSV across two full pipeline executions.

The first 22-test run also passed, with one Starlette/httpx deprecation warning. Its raw captures are retained in initial_execution_log.json. The suite was then expanded and rerun. Initial Matplotlib cache warnings were fixed by selecting a writable temporary cache. No failed or skipped pytest tests occurred.

Not performed: authentic personal recording, student signature, independent real-farm evaluation, production load testing and browser-driven manual Swagger interaction. API behavior was exercised with TestClient; this is not evidence of the student recording it.

Environment verification

Project-local virtual environment created empty before dependency installation; exact pins subsequently verified offline.

3.10.6 (tags/v3.10.6:9c7b4bd, Aug 1 2022, 21:53:49) [MSC v.1932 64 bit (AMD64)]
