INES Ruhengeri | SWE 3513 | Individual Assignment 2
AI-A2-7343

This draft must be personally reviewed and amended before signature. It does not assert that the student independently wrote AI-generated code or has already reviewed, understood or defended the complete system.

Disclosed assistance: OpenAI Codex generated substantial Python implementation, tests, documentation and packaging, and executed automated verification. The data and reported model metrics were computed by the supplied programs. AI-assisted interpretation drafts are identified for student rewriting; no personal reflection or demonstration video has been fabricated.

Student confirmation to complete only when truthful: I have reviewed the submitted code and evidence, checked the reported results, rewritten required interpretations in my own words, and can explain and modify the system. I have disclosed assistance in evidence/AI_USE.md and will follow applicable course rules for AI use. My demonstration recording is authentic, continuous and unedited.

Edits or additional assistance to disclose: _____
_____

Student signature: _____ Date: _____

Status: UNSIGNED - personal review and authentic demonstration pending.
